

WELCOME

JAKARTA AVIATION TRAINING CENTER

Jakarta Aviation Training Center (JATC) is an independent world-class simulator-training center located just 10 minutes from the international terminal at Jakarta Soekarno-Hatta Airport in Indonesia.

Located in the heart of Southeast Asia's aviation industry, JATC offers the full suite of pilot training solutions for both A320 and B737NG aircraft types. Our center has two Level D Full Flight Simulators - an A320 and a B737NG - which have Indonesian DGCA and European EASA certifications. With regulator-approved training courses and simulator time, JATC sets the highest standards of training for both its airlines and self-sponsored customers.

THE TRAINING CENTER

JATC is a 3,600-square meter complex, complete with four simulator bays, as well as training classrooms, briefing rooms, function areas, a full service pantry, lounge, praying room and state-of-the-art flight training devices. In combination with our world-class training solutions, our experienced staff and instructors ensure our customers are optimally trained for their cockpit responsibilities.

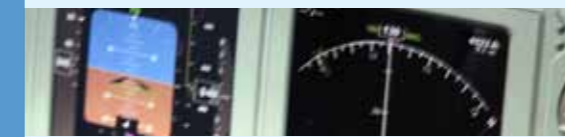

FACILITIES

Our unique location, state of the art devices and additional services make JATC an excellent training center. From briefing rooms to pilot lounge, from mock-ups to free shuttle services; 'we have it all'.

WORLD-CLASS TRAINING SOLUTIONS FOR AIRLINES AND SELF-SPONSORED CUSTOMERS

COURSES

Jakarta Aviation Training Center is a full-service aviation training provider, offering dry and wet lease training, recurrent training, type rating training, MCC, jet orientation courses, language assessments, instructor courses, pilot selection and aptitude test. JATC has training approvals from EASA, DGCA Indonesia, DGCA India and CAAP Philippines for its A320 and B737NG simulators and courses.

FULLY COMPREHENSIVE AVIATION TRAINING FACILITY OFFERING HIGH CLASS TRAINING SOLUTIONS

- Training approvals from the major aviation markets including Indonesia, Europe, Philippines and India
- Low cost of living in Jakarta
- VISA upon arrival for most countries

TRAINING DEVICES

STATE-OF-THE-ART SIMULATORS

JATC uses state of the art technology for its training. Our brand new Full Flight Simulators are equipped with the latest technology and multiple engine types including IAE and CFM.

The Boeing 737-800W NG and the Airbus A320-200 are manufactured by our partner Sim-Industries, a Lockheed Martin Company. Both of these devices benefit from Sim-Industries' known highest level of production standards, including the best visual system on the market, using the Rockwell Collins EP-8000 system. The high level of durability of the simulators from the use of all real aircraft parts and the world's best components, including a Moog motion system, means the simulators not only offer the customer the highest level of training fidelity but also ensure the lowest amount of simulator downtime in the market.

The Boeing 737-300 EFIS is a Link-Miles built device.

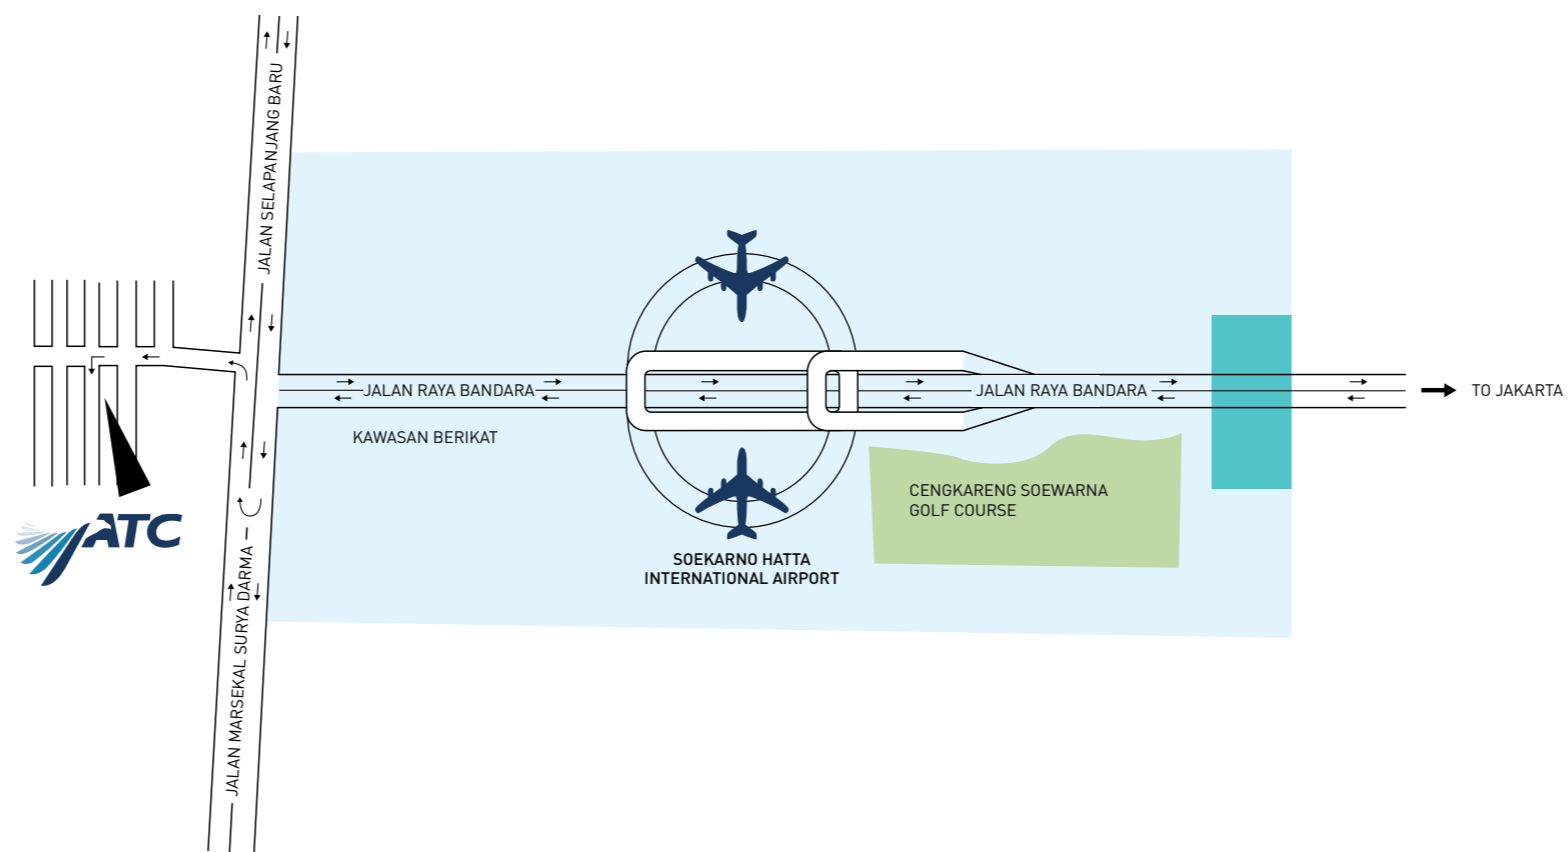

JATC also has full-scale cockpit mock-ups for each type available as well as Type specific IPT's and CBT ground school capabilities.

DIRECTIONS

Located in Bandara Mas, JATC is just a few minutes west of Jakarta's International Airport Soekarno-Hatta. The easiest way to get to our facility is to let us know your itinerary and we can arrange a pickup for you.

HOW TO GET HERE

Coming from the Airport or Jakarta, you initially drive west on Jalan Raya Bandara, the main airport road. It transitions automatically into Jalan Marsekal Surya Darma where you drive south. Make a U-turn driving north and make a left turn into 'Bandara Mas'. Roughly 600 meters ahead from the turn, take the second street to the left. Continue straight and after 300 meters you will find JATC on your left-hand side.
